

Lab Mid

Name: Fatima Azhar

Reg#: FA24-BCS-145

Section: B

Course: Web Technologies

Instructor: Usman Akram

N = 45 BP = 645px H = 315 K = 3

Task 1

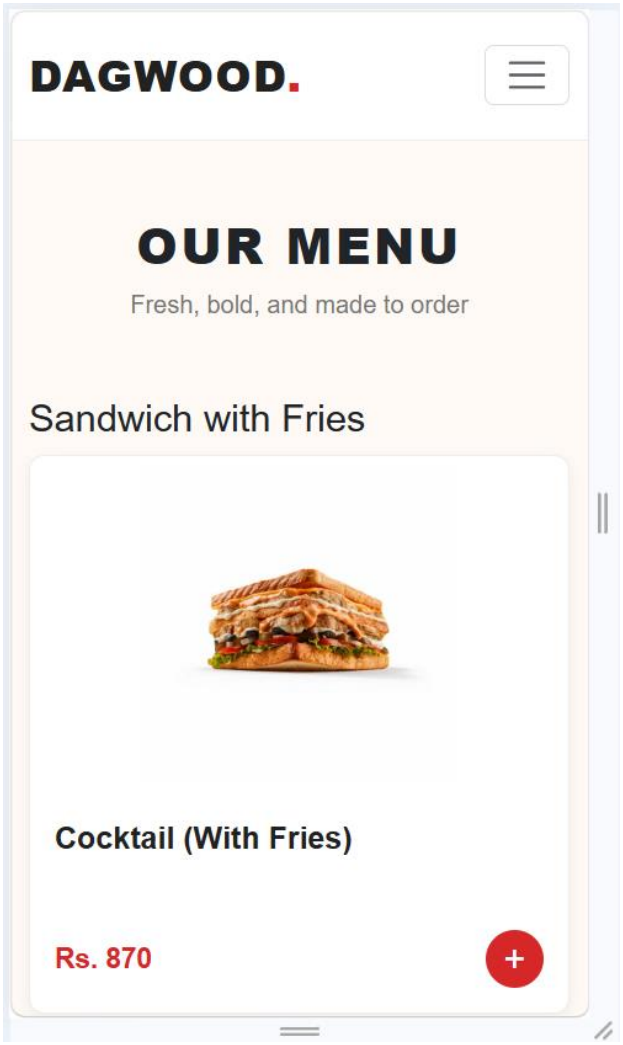

Task 1 - Mega-menu in your existing navbar

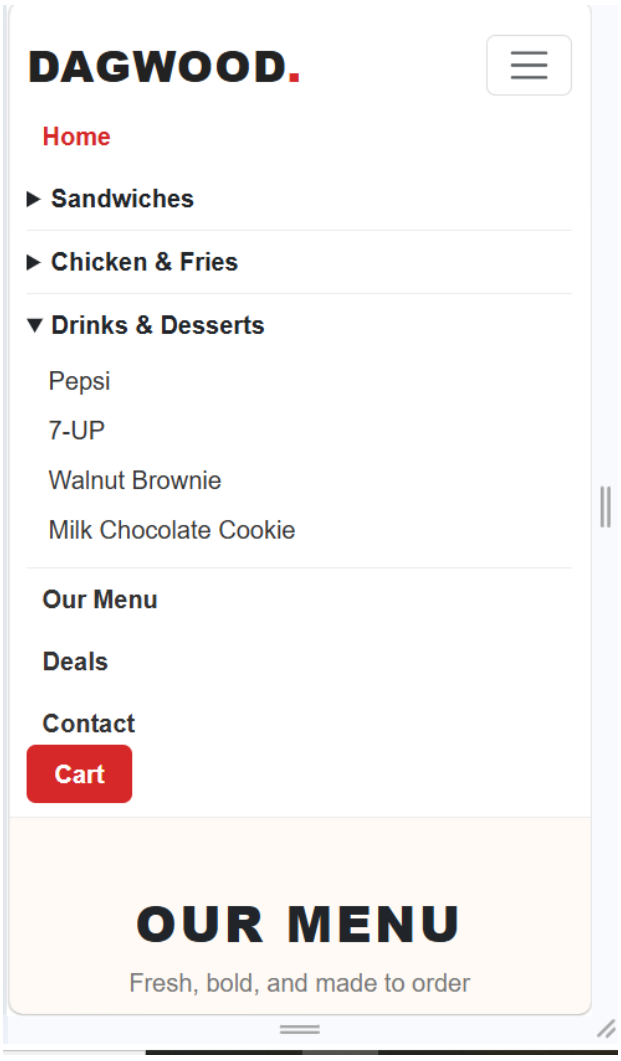

Add a "Shop by Category" item to the navbar you built in Assignment 2. It must work with no JavaScript of your own (your framework's own hamburger script may stay).

- From BP and wider: hovering OR keyboard-focusing "Shop by Category" opens a full-width panel under the navbar with K columns of links (at least 4 links per column, one heading per column). It must open with Tab alone (use :focus-within), stay open while the pointer moves from the menu item into the panel, and close when focus leaves.
- The open panel must appear above everything on the page, including your product grid, card hover effects and any sticky element, and must not push the page content down.
- Below BP: inside your existing collapsed (hamburger) menu, the same K groups become an accordion made with `<details>` and `<summary>` (closed by default, each opening independently).
- Use semantic markup: the links stay inside your `<nav>`, each column is a list, and the panel has a visible heading per column.

Task 1 Code Changes/Updates- Mega-menu in the navbar

1. index.html and product.html - navbar tag

Removed the navbar-expand-md class so the collapse point can be set at 645px in CSS.

```
<nav class="navbar dagwood-navbar">
```

2. index.html and product.html - new menu items

Pasted right after the Home <li>, inside <ul class="navbar-nav mx-auto">.

```
<!-- Desktop mega-menu (shown at 645px and wider) -->
<li class="nav-item mega-item">
  <a class="nav-link" href="index.html#menu" aria-haspopup="true">Shop by Category</a>
  <div class="mega-panel">
    <div class="container mega-grid">
      <div>
        <h3>Sandwiches</h3>
        <ul>
          <li><a href="product.html">Cocktail</a></li>
          <li><a href="index.html#sandwiches">Fillet Steak</a></li>
          <li><a href="index.html#sandwiches">Cheese Lover</a></li>
          <li><a href="index.html#sandwiches">All Sandwiches</a></li>
        </ul>
      </div>
      <div>
        <h3>Chicken &amp; Fries</h3>
        <ul>
          <li><a href="index.html#chicken">3 Chicken Strips</a></li>
          <li><a href="index.html#chicken">6 Chicken Strips</a></li>
          <li><a href="index.html#chicken">Large Fries</a></li>
          <li><a href="index.html#chicken">All Chicken</a></li>
        </ul>
      </div>
      <div>
        <h3>Drinks &amp; Desserts</h3>
        <ul>
          <li><a href="index.html#beverages">Pepsi</a></li>
          <li><a href="index.html#beverages">7-UP</a></li>
          <li><a href="index.html#desserts">Walnut Brownie</a></li>
          <li><a href="index.html#desserts">Milk Chocolate Cookie</a></li>
        </ul>
      </div>
    </div>
  </div>
</li>

<!-- Mobile accordion (shown below 645px) -->
<li class="nav-item mobile-cats">
  <details>
    <summary>Sandwiches</summary>
    <ul>
      <li><a href="product.html">Cocktail</a></li>

    </ul>
  </details>
</li>
```

3. style.css - changed existing rule

The mobile navbar media query now ends at 644.98px instead of 767.98px.

```
/* Changed: existing mobile navbar media query (was 767.98px) */
@media (max-width: 644.98px) {
  .navbar-collapse { padding-top: 15px; }
  .navbar-nav .nav-link { margin: 5px 0; }
  .cart-link { display: inline-block; margin-top: 10px; }
}
```

4. style.css - added at the end of the file

```
/* ===== Task 1: Mega-menu (BP = 645px, accent H = 315) ===== */
:root { --accent: hsl(315, 70%, 45%); }

/* Let the navbar use the full width so 5 links fit */
.dagwood-navbar > .container { max-width: 1140px; }

/* --- Mobile (below 645px): accordion --- */
.mega-item { display: none; }
.mobile-cats details { border-bottom: 1px solid #eeeeee; }
.mobile-cats summary { padding: 8px 0; font-weight: 600; cursor: pointer; }
.mobile-cats ul { list-style: none; margin: 0; padding: 0 0 8px 14px; }
.mobile-cats a { color: #333333; text-decoration: none; display: block; padding: 4px
0; }
.mobile-cats a:hover { color: var(--accent); }

/* --- Desktop (645px and wider) --- */
@media (min-width: 645px) {
  /* replaces Bootstrap's navbar-expand-md at our own breakpoint */
  .navbar-toggler { display: none; }
  .navbar-collapse { display: flex !important; flex-basis: auto; }
  .navbar-nav { flex-direction: row; }
  .navbar-nav .nav-link { padding: 8px 6px; margin: 0 2px; font-size: 14px; }

  .mobile-cats { display: none; }
  .mega-item { display: block; }

  /* full-width panel, hidden by default; .navbar is already position:relative */
  .mega-panel {
    display: none;
    position: absolute;
    top: 100%;
    left: 0;
```

```
    right: 0;
    z-index: 1100;               /* above cards, hover effects, sticky bars */
    background: #ffffff;
    border-bottom: 3px solid var(--accent);
    box-shadow: 0 8px 20px rgba(0, 0, 0, 0.12);
    padding: 24px 0;
  }
  /* invisible bridge so hover isn't lost in the gap under the link */
  .mega-panel::before {
    content: "";
    position: absolute;
    top: -18px;
    left: 0;
    right: 0;
    height: 18px;
  }

  /* open on hover OR keyboard focus anywhere inside the item */
  .mega-item:hover .mega-panel,
  .mega-item:focus-within .mega-panel { display: block; }

  .mega-grid {
    display: grid;
    grid-template-columns: repeat(3, 1fr);   /* K = 3 columns */
    gap: 24px;
  }
  .mega-panel h3 {
    font-size: 15px;
    font-weight: 800;
    text-transform: uppercase;
    color: var(--accent);
    border-bottom: 2px solid var(--accent);
    padding-bottom: 6px;
    margin-bottom: 10px;
  }
  .mega-panel ul { list-style: none; margin: 0; padding: 0; }
  .mega-panel li { margin-bottom: 6px; }
  .mega-panel a { color: #333333; text-decoration: none; }
  .mega-panel a:hover,
  .mega-panel a:focus { color: var(--accent); }
}

@media (min-width: 992px) {
  .navbar-nav .nav-link { margin: 0 10px; padding: 8px 12px; font-size: 16px; }
}

/* Tablet fit: keep navbar on one row between 645px and 991px */
@media (min-width: 645px) and (max-width: 991.98px) {
  .navbar-brand { font-size: 22px; }
  .navbar-nav { flex-wrap: nowrap; }
  .navbar-nav .nav-link {
    font-size: 13px;
    padding: 6px 4px;
    margin: 0 2px;
    white-space: nowrap;
  }
  .cart-link { padding: 8px 12px; font-size: 14px; }
}
```

5. index.html - product grid breakpoint

Changed col-md-6 to col-sm-6 so cards go two per row from 576px.

```
<!-- Before -->
<div class="col-12 col-md-6 col-lg-3">

<!-- After (every product card wrapper in index.html) -->
<div class="col-12 col-sm-6 col-lg-3">
```

TASK 2

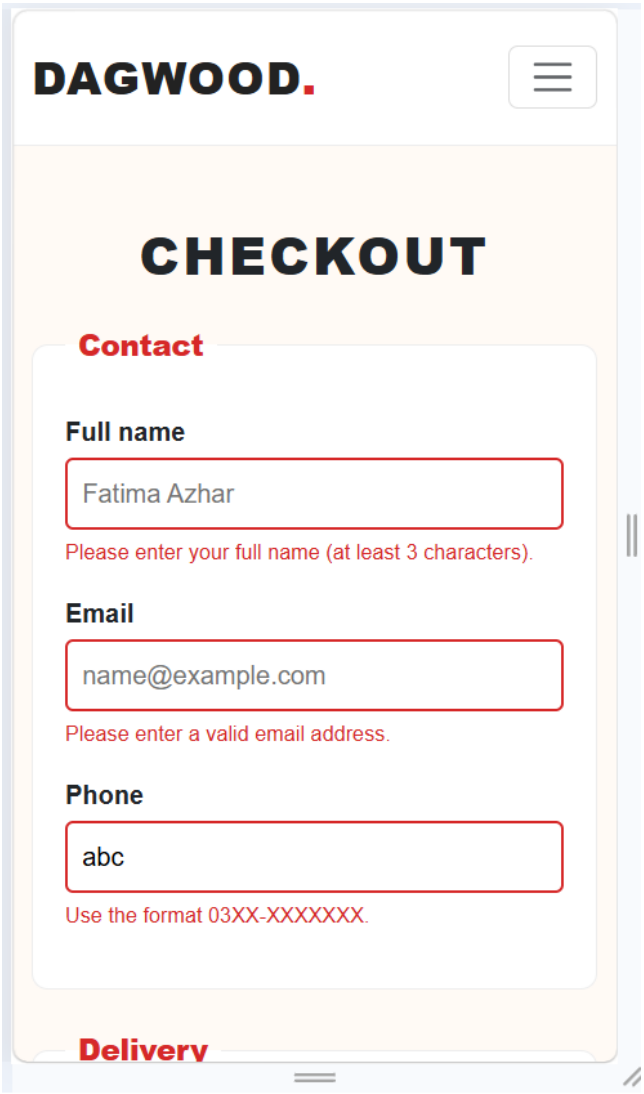

Task 2 - Checkout form with HTML5 validation only

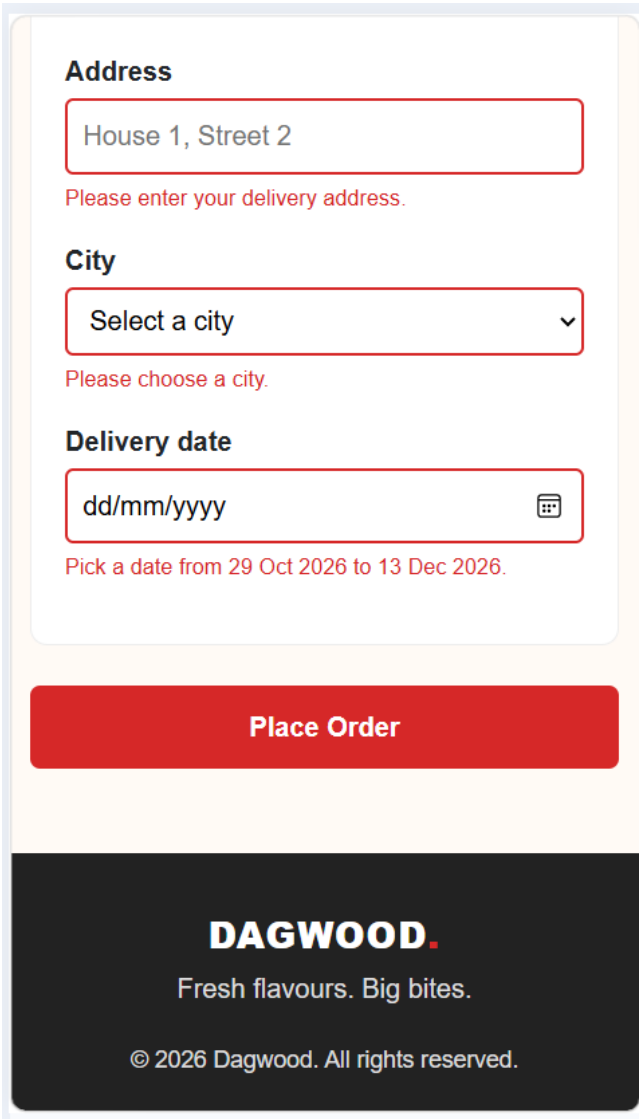

Create midterm/checkout.html linked from your cart icon. Use only HTML5 form features and CSS for validation (no JavaScript).

- Two `<fieldset>`s with `<legend>`s: "Contact" (full name, email, phone) and "Delivery" (address, city as a `<select>`, and a delivery date). Every input has a `<label>` joined to it with for/id.
- Phone must accept only the format 03XX-XXXXXXX (use the pattern attribute); the delivery date cannot be earlier than the exam date and not more than N days after it (use min and max).
- Invalid fields show a red border and a short message only after the user has interacted with them, not on page load (hint: :user-invalid, or :not(:placeholder-shown) with :invalid).
- From BP and wider the two fieldsets sit side by side, with labels aligned in a column on the left of their inputs (CSS Grid); below BP, one column with labels above inputs. The submit button is full width at every size.

Task 2 Code Changes/Updates- Checkout form with HTML5 validation

Exam date taken as 2026-10-29; N = 45 days later gives max = 2026-12-13.

1. index.html and product.html - cart link

The cart icon now links to the checkout page.

```
<a class="cart-link" href="checkout.html">Cart</a>
```

2. checkout.html (new file) - form section

The navbar and footer are copied from the other pages; the new part is the form below.

```
<!-- Checkout form -->
<main class="container my-5">
  <h1 class="menu-title text-center mb-4">CHECKOUT</h1>

  <form action="#" method="get">
    <div class="checkout-grid">

      <fieldset>
        <legend>Contact</legend>

        <div class="field">
          <label for="fullname">Full name</label>
          <input type="text" id="fullname" name="fullname" required minlength="3"
                 placeholder="Fatima Azhar">
          <span class="msg">Please enter your full name (at least 3
characters).</span>
        </div>

        <div class="field">
          <label for="email">Email</label>
          <input type="email" id="email" name="email" required
                 placeholder="name@example.com">
          <span class="msg">Please enter a valid email address.</span>
```

```
    </div>

    <div class="field">
      <label for="phone">Phone</label>
      <input type="tel" id="phone" name="phone" required
             pattern="03[0-9]{2}-[0-9]{7}"
             title="Format: 03XX-XXXXXXX"
             placeholder="0300-1234567">
      <span class="msg">Use the format 03XX-XXXXXXX.</span>
    </div>
  </fieldset>

  <fieldset>
    <legend>Delivery</legend>

    <div class="field">
      <label for="address">Address</label>
      <input type="text" id="address" name="address" required minlength="5"
             placeholder="House 1, Street 2">
      <span class="msg">Please enter your delivery address.</span>
    </div>

    <div class="field">
      <label for="city">City</label>
      <select id="city" name="city" required>
        <option value="">Select a city</option>
        <option>Islamabad</option>
        <option>Rawalpindi</option>
        <option>Lahore</option>
        <option>Karachi</option>
      </select>
      <span class="msg">Please choose a city.</span>
    </div>
```

```
        <div class="field">
          <label for="date">Delivery date</label>
          <input type="date" id="date" name="date" required
                 min="2026-10-29" max="2026-12-13">
          <span class="msg">Pick a date from 29 Oct 2026 to 13 Dec 2026.</span>
        </div>
      </fieldset>

    </div>

    <button type="submit" class="detail-add-btn checkout-submit">Place Order</button>
  </form>
</main>
```

3. style.css - added at the end of the file

```
/* ===== Task 2: Checkout form (BP = 645px) ===== */
.checkout-grid {
  display: grid;
  grid-template-columns: 1fr;          /* below BP: one column */
  gap: 24px;
  margin-bottom: 24px;
}
.checkout-grid fieldset {

/* full-width submit at every size */
.checkout-submit { display: block; width: 100%; }
/* let fieldsets and inputs shrink instead of overflowing */
```

```
.checkout-grid fieldset { min-width: 0; }
.field input,
.field select { min-width: 0; box-sizing: border-box; }

/* BP and wider: fieldsets side by side, labels in a left column */
@media (min-width: 645px) {
  .checkout-grid { grid-template-columns: 1fr 1fr; }
  .checkout-grid fieldset { padding: 14px; }
  .field {
    grid-template-columns: 82px minmax(0, 1fr);  /* label | input */
    align-items: center;
    column-gap: 8px;
  }
  .field label { font-size: 14px; }
  .field input,
  .field select { padding: 6px; font-size: 14px; }
  .field .msg { grid-column: 2; }      /* message under the input */
}

/* roomy desktop: bigger label column and padding */
@media (min-width: 992px) {
  .checkout-grid fieldset { padding: 20px; }
  .field { grid-template-columns: 110px minmax(0, 1fr); column-gap: 12px; }
  .field label { font-size: 16px; }
  .field input,
  .field select { padding: 9px; font-size: 16px; }
}
```

TASK 3

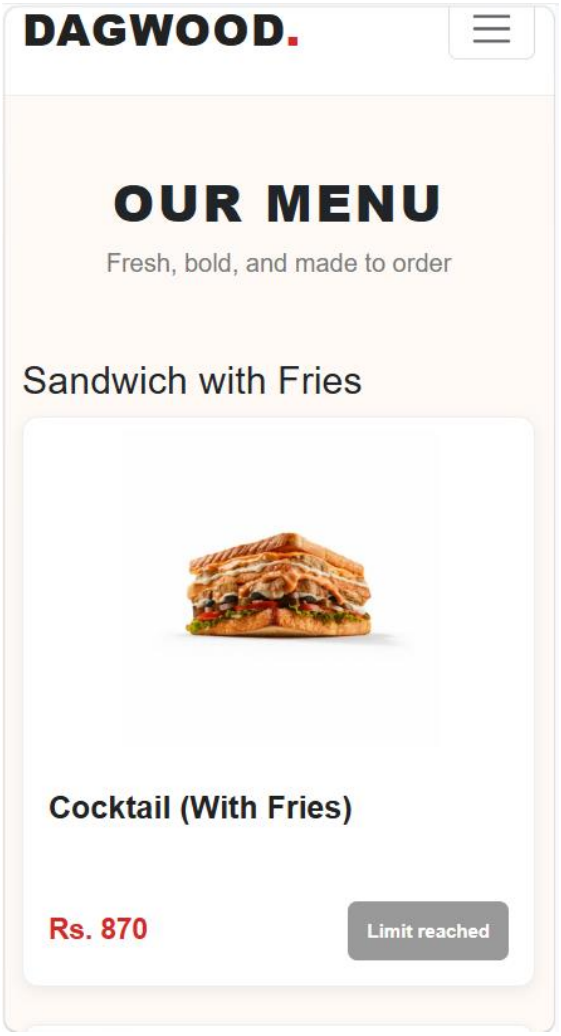

Task 3 - JavaScript: working cart badge and mini cart

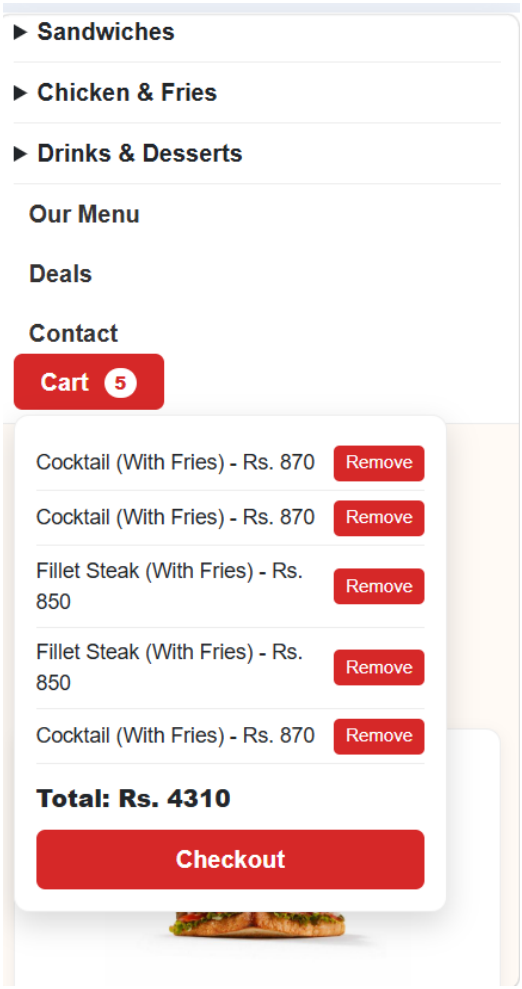

Add midterm/script.js and link it to your listing page. Plain JavaScript only (no jQuery, no framework). Work with the product cards and the "Add to Cart" buttons already on your page.

- Clicking "Add to Cart" on any card adds that product (name and price, read from the card itself) to an array, and the cart icon in your navbar shows a badge with the number of items in the cart.
- Clicking the cart icon opens a small mini-cart panel under it, listing each product with its price and a "Remove" button, and the total price calculated with reduce(). Removing an item updates the list, the total and the badge immediately. Clicking the cart icon again closes the panel.
- A product may be added at most (N mod 4) + 2 times; after that its button changes to "Limit reached" and is disabled until one of that product is removed.

Task 3 Code Changes/Updates- Cart badge and mini cart

Limit per product = (N mod 4) + 2 = (45 mod 4) + 2 = 3.

1. index.html and product.html - cart link replaced with this block

```
<div class="cart-wrap">

  <a class="cart-link" href="checkout.html" id="cartBtn">Cart <span id="cartBadge"
class="cart-badge">0</span></a>

  <div id="miniCart" class="mini-cart" hidden>

    <ul id="cartList"></ul>

    <p class="cart-total">Total: Rs. <span id="cartTotal">0</span></p>

    <a href="checkout.html" class="mini-checkout">Checkout</a>

  </div>

</div>
```

2. index.html and product.html - script link (bottom of the page)

```
<script src="script.js"></script>
```

3. script.js (new file)

```
// Limit per product = (N mod 4) + 2 = (45 mod 4) + 2 = 3

const LIMIT = 3;

let cart = [];                        // each item: { name, price }

// load the saved cart so both pages share it

try { cart = JSON.parse(localStorage.getItem('cart')) || []; } catch (e) { cart = [];
}

function save() {

  try { localStorage.setItem('cart', JSON.stringify(cart)); } catch (e) {}

}

const cartBtn   = document.getElementById('cartBtn');

const miniCart  = document.getElementById('miniCart');

const cartList  = document.getElementById('cartList');
```

```
const cartTotal = document.getElementById('cartTotal');

const cartBadge = document.getElementById('cartBadge');

const addButtons = document.querySelectorAll('.add-btn');       // listing page

const detailBtn  = document.querySelector('.detail-add-btn');   // product page

function clean(text) { return text.replace(/\s+/g, ' ').trim(); }

function toNumber(text) { return Number(text.replace(/[^0-9]/g, '')); }

function getName(card)  { return clean(card.querySelector('h5').textContent); }

function getPrice(card) { return toNumber(card.querySelector('.product-info
p').textContent); }

function countOf(name)  { return cart.filter(item => item.name === name).length; }

function detailName() { return clean(document.querySelector('.detail-
title').textContent); }

// redraw badge, list, total and button states

function render() {

  cartBadge.textContent = cart.length;

  if (cart.length === 0) {

    cartList.innerHTML = '<li>Your cart is empty</li>';

  } else {

    cartList.innerHTML = cart.map((item, i) =>

      `<li>

         <span>${item.name} - Rs. ${item.price}</span>
